

[The last OTRAG rocket - launched from Esrange](#)

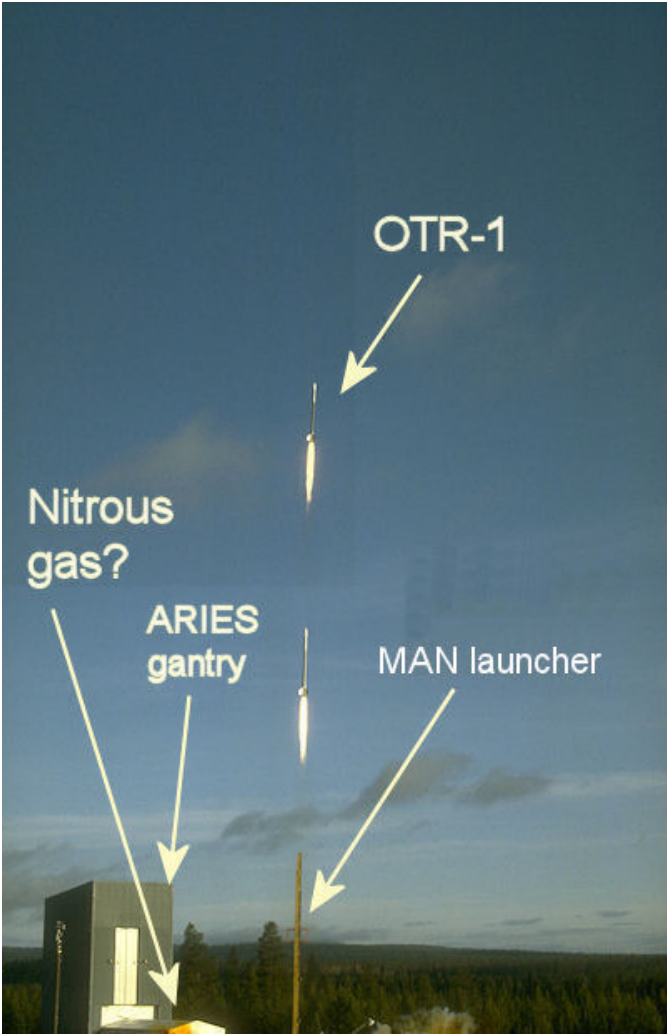

Sven Grahn

By clicking the title above you will be directed to the detailed description and analysis of the final launch of the OTRAG 1-3-B rocket.

After this only partially successful launch the company "Orbital Transport AG" (OTRAG) was dissolved by its shareholders (see also main article).

A brief history of the company and the description of the components of their low-cost rocket are described in a separate article in the "Journal":

OTRAG - The Low Cost Rocket

Overlay picture of the lift-off phase of the last OTRAG rocket (OTR-1-3-B) from Esrange, Kiruna
